

Physician Compare Downloadable Databases - Data Dictionary

This data dictionary describes the four downloadable data files available for Physician Compare. They include one file of demographic data describing individual physicians and other clinicians and three files of individual clinician and group performance rates on multiple CMS quality measures.

Table of Contents

Physiciandemo

The Physician Compare downloadable file is organized at the individual eligible professional level; each line is unique at the professional/enrollment record/group/address level. Clinicians with multiple Medicare enrollment records and/or single enrollments linking to multiple practice locations are listed on multiple lines.

EP-PQRS-QCDR

Physician Quality Reporting System (PQRS) and non-PQRS Qualified Clinical Data Registry (QCDR) measure performance rates reported by clinicians.

GRP-PQRS

Physician Quality Reporting System (PQRS) measure performance rates reported by groups.

GRP-CAHPS

Consumer Assessment of Healthcare Providers and Systems (CAHPS) for PQRS measure performance rates reported by groups.

Physician Compare National Downloadable File

The Physician Compare downloadable file is organized at the individual eligible professional level; each line is unique at the professional/enrollment record/group/address level. Clinicians with multiple Medicare enrollment records and/or single enrollments linking to multiple practice locations are listed on multiple lines.

Variable Label	Variable	Description	Length	Values
Professional Identification				
NPI	NPI	Unique clinician ID assigned by NPPES	10	digits
Ind_PAC_ID	PAC ID	Unique individual clinician ID assigned by PECOS	10	digits
Ind_enrl_ID	Clinician Enrollment ID	Unique ID for the clinician enrollment that is the source for the data in the observation	15	digits
lst_nm	Last Name	Individual clinician last name	35	string
frst_nm	First Name	Individual clinician first name	25	string
mid_nm	Middle Name	Individual clinician middle name	25	string
suff	Suffix	Individual clinician suffix	10	string
gndr	Gender	Individual clinician gender	1	M/F/U
Medical Credentials				
Cred	Credential	Medical credential such as MD, DO, DPM, etc.	3	string
Med_sch	Medical school name	Individual clinician's medical school	100	string
Grd_yr	Graduation year	Individual clinician's medical school graduation year	4	digits
Pri_spec	Primary specialty	Primary medical specialty reported by the individual clinician in the selected enrollment	50	string
Sec_spec_1	Secondary specialty 1	First secondary medical specialty reported by the individual clinician in the selected enrollment	50	string
Sec_spec_2	Secondary specialty 2	Second secondary medical specialty reported by the individual clinician in the selected enrollment	50	string
Sec_spec_3	Secondary specialty 3	Third secondary medical specialty reported by the individual clinician in the selected enrollment	50	string
Sec_spec_4	Secondary specialty 4	Fourth secondary medical specialty reported by the individual clinician in the selected enrollment	50	string

Variable Label	Variable	Description	Length	Values
Sec_spec_all	All secondary specialties	All four secondary specialties reported by the individual clinician in the selected enrollment, separated by commas	200	string
Medical Practice				
Org_nm	Organization legal name	Legal name of the group that the individual clinician works with- will be blank if the address is not linked to a group	70	string
Org_PAC_ID	Group PAC ID	Unique group ID assigned by PECOS to the group that the individual clinician works with- will be blank if the address is not linked to a group	10	string
num_org_mem	Number of Group members	Total number of individual clinicians affiliated with the group based on Group Practice PAC ID	4	numeric
adr_ln_1	Line 1 Street Address	Group or individual's line 1 address	55	string
adr_ln_2	Line 2 Street Address	Group or individual's line 2 address	55	string
ln_2_sprs	Marker of address line 2 suppression	Marker that address as reported may be incomplete	1	Y/blank
cty	City	Group or individual's city	30	string
st	State	Group or individual's state	2	string
zip	Zip Code	Group or individual's zip code (9 digits when available)	9	digits
phn_numbr	Phone Number	Phone number is listed only when there is a single phone number available for the address	20	string
hosp_afl_1	Hospital affiliation CCN 1	Medicare CCN of hospital where individual clinician provides service	6	digits
hosp_afl_lbn_1	Hospital affiliation LBN 1	Legal business name of hospital where individual clinician provides service	70	string
hosp_afl_2	Hospital affiliation CCN 2	Medicare CCN of hospital where individual clinician provides service	6	digits
hosp_afl_lbn_2	Hospital affiliation LBN 2	Legal business name of hospital where individual clinician provides service	70	string
hosp_afl_3	Hospital affiliation CCN 3	Medicare CCN of hospital where individual clinician provides service	6	digits
hosp_afl_lbn_3	Hospital affiliation LBN 3	Legal business name of hospital where individual clinician provides service	70	string

Variable Label	Variable	Description	Length	Values
hosp_afl_4	Hospital affiliation CCN 4	Medicare CCN of hospital where individual clinician provides service	6	digits
hosp_afl_lbn_4	Hospital affiliation LBN 4	Legal business name of hospital where individual clinician provides service	70	string
hosp_afl_5	Hospital affiliation CCN 5	Medicare CCN of hospital where individual clinician provides service	6	digits
hosp_afl_lbn_5	Hospital affiliation LBN 5	Legal business name of hospital where individual clinician provides service	70	string
Medicare Assignment/ Participation				
assgn	Clinician accepts Medicare Assignment	Y = Clinician accepts Medicare approved amount as payment in full M = Clinician may accept Medicare Assignment	1	Y/M
PQRS	Participating in PQRS	This represents satisfactory participation in the Physician Quality Reporting System (PQRS). This is a voluntary Medicare program encouraging clinicians and groups to report information on the recommended care they provide to patients. Medicare uses this information to give clinicians and groups performance scores. Clinicians can participate in this program themselves, or they can participate as part of a group or Accountable Care Organization (ACO). Those who participated in this program in 2015 may have performance scores available on their Physician Compare profile page.	1	Y/blank
EHR	Participating in EHR	This represents successful participation in the Electronic Health Records (EHR) Incentive Program. This program encourages clinicians to use certified EHR technology. Using electronic health records helps clinicians make efficient, safe, and beneficial treatment decisions by having timely information about patient health.	1	Y/blank

Variable Label	Variable	Description	Length	Values
MHI	Participated in Million Hearts	This represents successful participation in Million Hearts®. This is a national initiative to prevent 1 million heart attacks and strokes by 2017. The initiative encourages clinicians to report and perform well on activities related to heart health.	1	Y/blank

Physician Compare 2015 Individual EP Public Reporting

Physician Quality Reporting System (PQRS) and Qualified Clinical Data Registry (QCDR) measure performance rates reported by clinicians.

Measures are listed in the downloadable file using technical titles as outlined by the PQRS/non-PQRS QCDR measure specifications. To make measures more understandable to users, measures shown on Physician Compare profile pages are written in plain language. A measures crosswalk showing both technical measure titles and plain language measure titles and descriptions can be found on the [Physician Compare Initiative page](#).

For the first time, 2015 non-PQRS QCDR clinician-level measures were available for public reporting on Physician Compare. QCDRs could report these measures on their own websites or they could elect to have the measures publicly reported on Physician Compare. All QCDR measures that met the statistical reporting standards are included in the downloadable file regardless of where they were publicly reported.

NOTE: Inverse measures that were published on the public-facing profile pages on Physician Compare were reverse-scored, so that a higher score is better to ensure accurate website user interpretation. The original score is what is included in the downloadable file for these measures.

Variable Name	Variable Label	Description	Length	Values
NPI	NPI	Unique clinician ID assigned by NPPES	10	digits
Ind_PAC_ID	PAC ID	Unique individual clinician ID assigned by PECOS	10	digits
lst_nm	Last Name	Individual clinician last name	35	string
frst_nm	First Name	Individual clinician first name	25	string
measure_ID	Measure Identifier	Components of measure ID: [program]_[reporting entity]_[measure number]_[stratum]; where program is defined as "PQRS" or "QCDR"; reporting entity is indicated as "EP" for clinician; measure number denotes the PQRS measure number or QCDR measure name abbreviation; and finally measures that only have a single stratum have a suffix of "_1".	20	string
measure_title	Measure Title	Technical measure title	250	string
invs_msr	Inverse Measure	Indicator for inverse measures	1	Y/N
prf_rate	Measure Performance Rate	Measure performance rate	3	numeric/blank

Variable Name	Variable Label	Description	Length	Values
rpt_mech	Reporting Mechanism	Reporting mechanisms are defined as: "CLM" for Claims; "REG" for Registry; and "QCDR" for Qualified Clinical Data Registry reporting.	4	string
live_site_IND	Reported on PC Live Site	Indicator for whether or not the measure is reported on the Physician Compare live site (i.e., measures with an "N" value are only available in the downloadable dataset).	1	Y/N

Physician Compare 2015 Group Public Reporting

Physician Quality Reporting System (PQRS) measure performance rates reported by groups.

Measures are listed in the downloadable file using technical titles as outlined by the PQRS measure specifications. To make measures more understandable to users, measures shown on Physician Compare profile pages are written in plain language. A measures crosswalk showing both technical measure titles and plain language measure titles and descriptions can be found on the [Physician Compare Initiative page](#).

NOTE: Inverse measures that were published on the public-facing profile pages on Physician Compare were reverse-scored, so that a higher score is better to ensure accurate website user interpretation. The original score is what is included in the downloadable file for these measures.

Variable Name	Variable Label	Description	Length	Values
Org_nm	Organization legal name or 'doing business as' name	Name of the group, as it appears on Physician Compare	70	string
Org_PAC_ID	Group PAC ID	Unique Group ID assigned by PECOS to the group	10	digits
ST	State	State with all or a majority of the group's locations	2	string
PQRS	Participating in PQRS	This represents satisfactory participation in the Physician Quality Reporting System (PQRS). This is a voluntary Medicare program encouraging groups to report information on the recommended care they provide to patients. Medicare uses this information to give clinicians and groups performance scores. Those who participated in this program in 2015 may have performance scores available on their Physician Compare profile page.	1	Y/blank
measure_ID	Measure Identifier	Components of measure ID: [program]_[reporting entity]_[measure number]_[stratum]; where program is defined as "PQRS"; reporting entity is indicated as "GRP" for group; measure number denotes the PQRS measure number; and finally measures that only have a single stratum have a suffix of "_1".	20	string
measure_title	Measure Title	Technical measure title	250	string
invs_msr	Inverse Measure	Indicator for inverse measures	1	Y/N
prf_rate	Measure Performance Rate	Measure performance rate	3	numeric/blank
FN	Footnote	1- Data are suppressed due to insufficient sample size. 2- No cases met the criteria for this measure. 3- Data were not satisfactorily reported.	1	1/2/3/blank

Variable Name	Variable Label	Description	Length	Values
rpt_mech	Reporting Mechanism	Reporting mechanisms are defined as: "WI" for Web Interface; and "REG" for Registry.	3	string
live_site_IND	Reported on PC Live Site	Indicator for whether or not the measure is reported on the Physician Compare live site (i.e., measures with an "N" value are only available in the downloadable dataset).	1	Y/N

Physician Compare 2015 Group Public Reporting - Patient Experience

Consumer Assessment of Healthcare Providers and Systems (CAHPS) for PQRS measure performance rates reported by groups.

Measures are listed in the downloadable file using technical titles as outlined by the PQRS measure specifications. To make measures more understandable to users, measures shown on Physician Compare profile pages are written in plain language. A measures crosswalk showing both technical measure titles and plain language measure titles and descriptions can be found on the [Physician Compare Initiative page](#).

Variable Name	Variable Label	Description	Length	Values
Org_nm	Organization legal name or 'doing business as' name	Name of the group, as it appears on Physician Compare	70	string
Org_PAC_ID	Group PAC ID	Unique Group ID assigned by PECOS to the group	10	digits
ST	State	State with all or a majority of the group's locations	2	string
measure_ID	Measure Identifier	Components of measure ID: [program]_[reporting entity]_[measure number]; where program is defined as "CAHPS"; reporting entity is defined as "GRP" for group; and measure number denotes the number assigned to each CAHPS for PQRS summary survey measure.	20	string
measure_title	Measure Title	Technical measure title	250	string
prf_rate	Measure Performance Rate	Measure performance rate	3	numeric/blank
FN	Footnote	8- Data are suppressed due to insufficient sample size or low reliability.	1	8/blank

Additional Information

Information in the downloadable files do not match the information as displayed on the Physician Compare website exactly, because:

- Clinician website profiles represent all clinician-level details while the downloadable file observations are at the clinician-enrollment-address level. If a clinician has more than one enrollment, more than one address per enrollment, or both, the individual clinician will have multiple entries in the downloadable file.
 - o This means that a single clinician may have different specialties and different credentials from each enrollment.
- The downloadable physician demographic database focuses on clinicians and their practice locations. There is no group level reporting in the downloadable
 - o To evaluate demographic data at the group level, you can adjust this file to categorize by group affiliation.
- Clinician IDs (including the NPI, PECOS PAC ID, and PECOS enrollment ID) and group or hospital IDs (including PECOS PAC ID and Medicare CCN) are included in the downloadable file to help distinguish clinicians and groups or hospitals with similar names. These IDs also help identify individual clinicians who are affiliated
- The marker of line 2 suppression means that there were multiple possible addresses for that clinician in the same building. If you need to find a mailing address for any entries with this flag, you may want to search for additional information like a suite number.
- Only Medicare data (PECOS and claims) are used in the downloadable file. All licensed data are excluded from this demographic dataset.
 - o There is no Board Certification information
 - o There is no residency data
- There are more measures represented in the downloadable performance scores files than on the live website. CMS decides which measures to publicly report on Physician Compare based on the published public reporting standards. Only those measures which are statistically valid, reliable, accurate, and comparable and resonate with website users are published on public-facing profile pages. If a measure meets all of the public reporting standards, except for the requirement that it resonates with users, it is added to the appropriate downloadable file, but is not included on the public-facing profile pages.
 - o For groups, 91 PQRS measures are published on their public-facing profile pages for program year 2015. Patient survey measures are also published for groups – specifically, 8 CAHPS for PQRS summary survey measures. An additional 21 PQRS measures are included in the downloadable file.
 - o For clinicians, 90 PQRS measures and 16 non-PQRS QCDR measures are published on their public-facing profile pages for program year 2015. An additional 10 PQRS measures and 15 non-PQRS QCDR measures are included in the downloadable file.
- Please note that for inverse measures that appear on the live Physician Compare website, the performance rates were reverse-scored, so that a higher score is better to ensure accurate website user interpretation. The original score is what is included in the downloadable performance scores files for these measures.
