

HOSPITAL ANNUAL DISCLOSURE REPORT

Complete Hospital Annual Financial Database

For Excel

30th through 35th Year Disclosure Cycles

Report Periods Ended June 30, 2004 through June 29, 2010

INTRODUCTION

The Office of Statewide Health Planning and Development (OSHPD) releases data products which contain each Hospital Annual Disclosure Report (HADR) submitted by California hospitals during a disclosure year. Since 1992, the HADR "Complete Database" has been available as a CD product containing page files and a line file formatted for COBOL or ASCII, that were extracted from a mainframe computer database.

In February 2010, OSHPD began processing annual financial disclosure reports using a new SQL database, which resulted in the need for a replacement product. After careful consideration of various options, OSHPD decided that an Excel-based product would meet the needs of the largest number of data users. The former CD product with page and line files will no longer be produced after the 33rd year (2007-08) disclosure cycle, because the mainframe database is no longer being updated.

The HADR Complete Database is available in two Excel formats: one for individuals who have access to Excel Versions 2007 or 2010; and another version for individuals who are using Excel versions 1997 to 2003. The files are fairly large, between 30 to 37 Mb, so you want to make sure your computer has enough memory and storage to accommodate such a large file. Working with sub-sets of the data is recommended.

To provide continuity with the new Excel-based product, OSHPD has developed similar products for the 28th year (2002-03) through 35th year (2009-10) disclosure cycles. Due to changes in the reporting form that occurred after the 29th year (2003-04) disclosure cycle, this documentation applies only to Hospital Annual Disclosure Reports beginning after that disclosure cycle. Separate documentation exists for the 28th year (2002-03) and 29th year (2003-04) disclosure cycles. A summary of the 30th year (2004-05) reporting form changes is included on pages 9 and 10 of this documentation.

This documentation applies to Hospital Annual Disclosure Reports for:

Financial Disclosure Cycle	Report Periods Ended	Through
30 th Year (2004-05)	June 30, 2004	June 29, 2005
31 st Year (2005-06)	June 30, 2005	June 29, 2006
32 nd Year (2006-07)	June 30, 2006	June 29, 2007
33 rd Year (2007-08)	June 30, 2007	June 29, 2008
34 th Year (2008-09)	June 30, 2008	June 29, 2009
35 th Year (2009-10)	June 30, 2009	June 29, 2010

EXCEL VERSIONS 1997-2003

File Layout

Due to the 256-column limit of spreadsheets using 1997-2003 versions of Excel, OSHPD had to use two worksheets to include the approximately 450 hospital reports in a typical disclosure cycle in a single file. Instead of displaying the data for each hospital in a row, the data for each report are displayed in a column.

The first four columns of each worksheet indicate the Page-Column-Line (PCL) reference and a description based on the HADR. The first two rows of each worksheet (beginning in column E) contain the OSHPD Facility Number and Report Period End Date, which are unique to each submitted report. Each worksheet contains the same number of rows (17,154) with the PCL reference being on the same row in each worksheet. The first worksheet includes 250 reports, with the remaining reports in the disclosure cycle on the second worksheet.

NOTE: This file was created using Excel 2007. If you are using Excel 97-2003 and are unable to open this file, you need to install the Microsoft Office Compatibility Pack for Excel File Formats. This patch is available for free at the Microsoft website.

Following is a sample file layout which shows the PCL headings in columns A-D, row 1. Beginning in column E, rows 1 and 2 display the OSHPD Facility Number and Report Period End Date, respectively.

EXCEL VERSIONS 2007 / 2010

File Layout

We took advantage of the 16,384 column limit available in the latest versions of Excel by displaying the data in a more traditional format, where each column represents a PCL on the report and each row contains the data for a single HADR. To stay within the column limit, Cost Allocation data (report pages 19, 20 and 20a) are on a separate worksheet. Each worksheet contains the same number of rows, with each HADR appearing on the same row in each worksheet.

Following are sample file layouts for the two worksheets. Beginning in column C, rows 1 through 4 indicate the HADR PCL reference and description. Beginning on row 5, columns A

and B indicate the OSHPD Facility Number and Report Period End date, which is unique for each submitted HADR. Actual reported data begins in cell C:5.

HADR PCL Labels

To help you identify the data located in each data file, download the PCL Label file, which includes the PCL reference (column D), an abbreviated description (column E), and full description (column F). The Excel 2007/2010 worksheet and column references are also included for each field (columns G and H). A sample of the HADR PCL Label file follows:

HOSPITAL REPORTING REQUIREMENTS

Non-Comparable Reports

Some hospitals are not required to submit all HADR pages listed above by statute or because a reporting modification has been granted. Reporting modifications are primarily granted when the data to be reported are not comparable to data filed by other hospitals. Below is a summary of those hospitals that do not submit a “comparable” report. A list of the hospitals that submitted a non-comparable report in 2009 is provided on pages 7 and 8 of this documentation.

Hospital Type	Reporting Modification
Kaiser Hospitals	By law, Kaiser is allowed to submit consolidated financial statements (report pages 5 through 9) for its Northern and Southern Regions, and limited financial and utilization data for its individual hospitals. Gross patient revenue and related deductions from revenue (report page 12) are not reported because Kaiser does not record charges or bill its member patients.
LTC Emphasis Hospitals	There are four (4) large hospitals that primarily provide long-term care. Although each hospital submits a full disclosure report, OSHPD classifies the reports as “non-comparable” because the inclusion of their data may distort certain aggregations.
Psychiatric Health Facilities (County-operated)	County-operated Psychiatric Health Facilities (PHFs) are permitted to submit only report pages 0, 1, 2, 4, 4.1, and 8, because of their small size, unique patient-mix, and type of care. Non-county PHFs are required to submit all report pages.
Shriner’s Hospitals	The two Shriner’s hospitals are permitted to submit only report pages 0 through 9, because of their charitable mission and because patients are not billed for services.
State Hospitals	State-operated hospitals are permitted to submit only report pages 0, 1, 2, 4, 4.1, and 8, because of their unique patient-mix and type of care.
Short Period Reports	Hospitals with short reporting periods (e.g., 90 days or less) may be granted permission to submit only report pages 0 through 9, due to data comparability issues on report pages 12 through 22 with other hospitals. The short reporting periods typically result when a facility changes licensure or ownership.

Duplicate Reports

The Complete Data Set files may contain more than one HADR for a hospital. Duplicate reports occur when a facility changes ownership or licensure, or fiscal year end, during a reporting cycle. In some cases, the duplicate report is also a Short Period Report, as described above. When encountering duplicate reports, users should ascertain which report is most relevant or useful. This can be either the report covering the longest reporting period or the most recently submitted report.

Note: When a hospital changes ownership or licensure, the facility’s name may also change. Accordingly, duplicate reports should be identified according to the OSHPD Facility Number, which is based on the hospital’s location.

Consolidated Licenses and Reports

Upon meeting certain criteria (e.g., a single governing body, administration, and medical staff, and close proximity), the California Department of Public Health may issue a consolidated license to multiple hospital locations, whereby a single location is designated as the Parent Facility and each remaining location is designated as a Consolidated Facility. Hospitals that operate under a consolidated license typically use an integrated accounting system and will be granted permission to submit a consolidated HADR under the OSHPD Facility Number of the Parent Facility.

When making year-to-year hospital comparisons, it's important to keep this licensing factor in mind. Currently, over 60 hospitals are operating with a consolidated license and submitting consolidated HADRs.

SUMMARY OF HOSPITAL ANNUAL DISCLOSURE REPORT CHANGES

In July 2003, OSHPD adopted regulations that changed the hospital annual reporting requirements. Below is a summary of the changes to the 30th year (2004-05) Hospital Annual Disclosure Report.

Report Page 0 – General information and Certification

Added Hospital Web site Address (line 16), Organization Name of report preparer (line 24), and Business E-mail Address of report preparer (line 27). Several other items were re-numbered.

Report Page 1 – Hospital Description

Added indicators (column 1, lines 45, 50 and 55) if the hospital has a Neonatal Intensive Care Unit (NICU) that has been approved as a standard by the California Children's Services (CCS) Branch of the Department of Health Care Services. There are three approved standards: Regional, Community or Intermediate. Standards for NICUs are located in Chapter 3.25 of the CCS Manual of Procedures.

Report Page 2 – Services Inventory

The number of service codes was reduced from nine (9) to four (4). A cross-reference between the former and current codes follows:

For Report Periods Ended Before June 30, 2004		For Report Periods Ended On or After June 30, 2004	
Service Code	Description	Service Code	Description
1	Separately organized, staffed, and equipped unit of hospital.	1	Service is available at the hospital.
2	Service maintained in hospital.	1	Service is available at the hospital.
3	Service contracted, but hospital based.	1	Service is available at the hospital.
4	Service not maintained in hospital, but available from outside contractor or other hospital.	2	Service is available through arrangement at another health care entity.
5	Service not maintained in hospital, but shared with another hospital under contract.	2	Service is available through arrangement at another health care entity.
6	Service not available.	3	Service is not available.
7	Special code for clinical services.	4	Special code for clinical services provided in emergency department.
8	Service available, but not billed by hospital.	1	Service is available at the hospital.
9	Service available, but not used during reporting cycle.	1	Service is available at the hospital.

SUMMARY OF HADR CHANGES (con't)

Report Page 4 - Patient Utilization Statistics

Added a Live Birth Summary (lines 600 through 625) to report live natural births and Cesarean Section births in various hospital locations. Previously, only deliveries performed in Labor and Delivery were reported. Hospitals are required to report live Natural Births (column 2) and Cesarean Section births (column 3) that occurred in Labor and Delivery (line 600), Surgery and Recovery (line 605), Alternate Birthing Center (line 610), Obstetrics Acute (line 615), and Emergency Services and other areas within the hospital (line 620).

The standard unit of measure (SUM) for several revenue/cost centers was changed:

Revenue / Cost Center	Line No.	Former SUM	Revised SUM
Cardiology Services	285	RVS Units	Procedures
Radiology-Diagnostic	300	RVS Units	Procedures
Radiology-Therapeutic	305	RVS Units	Procedures
Nuclear Medicine	310	RVS Units	Procedures
Magnetic Resonance Imaging	315	MRI Minutes	MRI Procedures
Ultrasonography	320	RVS Units	Procedures
Respiratory Therapy	325	RT Treatments	RT Adj. Patient Days
Physical Therapy	360	30 Minute Sessions	15 Minute Sessions
Occupational Therapy	370	30 Minute Sessions	15 Minute Sessions

Report Page 18 – Expense Trial Balance – Non-Revenue Producing Centers

The standard unit of measure (SUM) for three cost centers was changed.

Cost Center	Line No.	Former SUM	Revised SUM
Communications	135	Avg. No. Hospital Employees	Paid Hospital FTEs
General Accounting	155	Avg. No. Hospital Employees	Paid Hospital FTEs
Personnel	225	Avg. No. Hospital Employees	Paid Hospital FTEs
Nursing Administration	260	Avg. No. Nursing Personnel	Prod. Nursing FTEs
